## *About the Artist: GC Myers*

G.C. Myers is a self-taught contemporary artist living in the Finger Lakes region of New York. He was led to painting in mid-life through an unexpected set of circumstances. After a serious accident that occurred while building his home in the early nineties, Myers found that his recovery time sparked his imagination and he began to experiment with painting. He soon fell in love with creating art. Ever since then he has been painting full-time and exhibiting his work throughout the nation. Myers refers to himself as a painter of “internal landscapes,” and his work reflects numerous diverse influences such as, Art Nouveau, American Regionalist and Modernist paintings, Eastern philosophy, as well as Abstract Expressionism. Vividly colorful, filled with evocative line and texture, his paintings manage to transform the landscape into a subject that is highly emotional and contemplative. G.C. Myers currently lives and works in Horseheads, New York with his wife Cheri.
